

# **Mobile App Instructions**

#### Your Inhaler and Mobile App

• The inhalers in the Digihaler family have sensors that are built into the **electronic module** on top of the inhaler **(see Figure A)** 

The sensors in the module

- Track your inhaler events (recorded in the app as Good Inhalation, Fair Inhalation, Low or No Inhalation recorded within 1 minute of cap open, Exhalation, and Possible Air Vent Block)
- Measure inhalation airflow, which is the amount of effort for each inhalation. It is recorded as liters per minute [L/min], and tells you how you are inhaling
- There is also *Bluetooth*<sup>®</sup> wireless technology built into the module so that the information from your inhaler can be sent to the **mobile app (see Figure A)** 
  - Your inhaler events will be captured in the app any time your inhaler is connected. The electronic module stores your inhaler events as they happen
  - Bring your inhaler(s) within range of your smartphone regularly, with Bluetooth on and the app open, to update your app with the latest inhaler information
- You don't need the app or need to be near your smartphone in order for your inhaler to deliver medicine

#### **APPROVED USES FOR PROAIR DIGIHALER**

**PROAIR® DIGIHALER®** (albuterol sulfate) Inhalation Powder is a prescription medicine used in people 4 years of age and older to:

- treat or prevent bronchospasm in people who have reversible obstructive airway disease
- prevent exercise-induced bronchospasm

#### APPROVED USE FOR AIRDUO DIGIHALER AND ARMONAIR DIGIHALER

- **AIRDUO**<sup>®</sup> **DIGIHALER**<sup>®</sup> (fluticasone propionate and salmeterol) inhalation powder is a prescription medicine used to control symptoms of asthma and to prevent symptoms such as wheezing in people 12 years of age and older.
- **ARMONAIR**<sup>®</sup> **DIGIHALER**<sup>®</sup> (fluticasone propionate) inhalation powder is a prescription medicine for the long-term treatment of asthma in patients 12 years and older.
- **AIRDUO DIGIHALER AND ARMONAIR DIGIHALER** are not used to relieve sudden breathing problems from asthma and won't replace a rescue inhaler.

ArmonAir digihaler (fluticasone propionate 113 mcg) Inhalation Powder

#### **Downloading Your Digihaler App**

- In order to use the app, you will need to download and install it on your smartphone. An Internet connection is required to download the app
   Download on the
- Search for "Digihaler" in the App Store® or Google Play™
- Download the free app
- You may need to update the Digihaler app when newer versions are available

	Figure B	

Once you have installed the app, you will need to:

Create an account or login. You will need an Internet connection to do this.

- After downloading the app, tap "Get Started" on the Welcome Screen
- Enter your date of birth and accept the Terms of Use and Privacy Notice to continue

GET IT ON

Google Play

App Store

- You must be 18 years or older to create an account
- You will then be asked for permission to use "amazonincognito.com" to redirect you to Teva's authentication server, for authentication
- If you already have an account, you can log in or tap "Need to Sign Up?" to create a new account **(see Figure B)**
- Lastly, you need to select the patient who will be using the app
  - You can select yourself or add a "Teenage Profile" for your dependent
  - To add a "Teenage Profile," you will need to specify the first and last names of the teenager and their date of birth

#### **IMPORTANT SAFETY INFORMATION FOR PROAIR DIGIHALER**

• Do not use PROAIR DIGIHALER (albuterol sulfate) Inhalation Powder if you are allergic to albuterol sulfate, lactose, milk proteins, or any of the ingredients in PROAIR DIGIHALER. Ask your healthcare provider if you have any questions or are not sure

## IMPORTANT SAFETY INFORMATION FOR AIRDUO DIGIHALER AND ARMONAIR DIGIHALER

- AIRDUO DIGIHALER contains salmeterol. Long-acting beta<sub>2</sub>-agonist (LABA) medicines such as salmeterol when used alone increase the risk of hospitalizations and death from asthma problems.
   AIRDUO DIGIHALER contains an inhaled corticosteroid (ICS) and a LABA. When an ICS and a LABA are used together, there is not a significant increased risk in hospitalizations and death from asthma problems.
- Do not use AIRDUO DIGIHALER or ARMONAIR DIGIHALER to treat sudden breathing problems from asthma. Always have a rescue inhaler with you to treat sudden symptoms.

#### **Getting Started With Your Digihaler App**

#### Pair your inhaler with the app

- You can scan your inhaler by tapping on "Set Up a Digihaler." Align the QR code on top of your inhaler behind your smartphone so you can see the QR code in the yellow square on your screen (see Figure C)
  - The first time you attempt to scan an inhaler, you will receive a message asking for permission to use the camera

#### Name your inhaler

- You can choose one of the names from the list or create your own name
- The app will then show the confirmation screen, which will alert you that your inhaler is registered and ready to use
  - For AirDuo Digihaler and ArmonAir Digihaler: You will also be informed about the default reminder times (8AM and 8PM).
     You can change these reminder times in Notification Settings
- You can add other inhalers at the end of the onboarding walkthrough, which takes place the first time you use your app **(see page 4)**

#### **IMPORTANT SAFETY INFORMATION FOR PROAIR DIGIHALER**

### • Before using PROAIR DIGIHALER, tell your healthcare provider about all of your medical conditions, including if you:

- have heart problems
- have high blood pressure (hypertension)
- have convulsions (seizures)
- have thyroid problems

- have diabetes
- have low potassium levels in your blood
- are pregnant or planning to become pregnant
- are breastfeeding or planning to breastfeed

#### IMPORTANT SAFETY INFORMATION FOR AIRDUO DIGIHALER AND ARMONAIR DIGIHALER

• **Do not** use **AIRDUO DIGIHALER** or **ARMONAIR DIGIHALER** if you have a severe allergy to milk proteins or if you are allergic to any of the ingredients in the product. Ask your healthcare provider if you are not sure.

#### **The Digihaler App Home Screen**

On the Home Screen, you will see the following (see Figure D):

#### **Digihaler Support Menu**

In the Digihalers and Safety Screen, each of your paired inhalers will have a link to a Support page. The Support page will include the following **(see Figure E)**:

#### **IMPORTANT SAFETY INFORMATION FOR PROAIR DIGIHALER**

- Tell your healthcare provider about all the medicines you take, especially:
  - o other inhaled medicines or asthma medicines
  - beta blocker medicines
  - diuretics
  - digoxin
  - monoamine oxidase inhibitors
  - tricyclic antidepressants

### IMPORTANT SAFETY INFORMATION FOR AIRDUO DIGIHALER AND ARMONAIR DIGIHALER

- Do not use AIRDUO DIGIHALER or ARMONAIR DIGIHALER more often than prescribed.
- Do not take **AIRDUO DIGIHALER with other medicines that contain a LABA for any reason**.
- Tell your healthcare provider about all the medicines you take and about all of your health conditions.

#### **Feedback and Notifications**

There are several notifications you may see, based on your inhaler events. They will appear as pop-ups on your screen if your app is open. Some will appear as background notifications if your app is closed.

If your inhaler is within range of your smartphone within 15 minutes of an inhaler event, you will get a notification confirming that the event has been received by the app (see Figure F).

• You can manage notifications within Notification Settings in the app

Notifications must be enabled in order to receive alerts and reminders when the app is closed.

Illustrated here with ProAir Digihaler but also applies for AirDuo Digihaler and ArmonAir Digihaler.

#### **IMPORTANT SAFETY INFORMATION FOR PROAIR DIGIHALER**

• **Do not** increase your dose or take extra doses of **PROAIR DIGIHALER** without first talking to your healthcare provider

## IMPORTANT SAFETY INFORMATION FOR AIRDUO DIGIHALER AND ARMONAIR DIGIHALER

- **Do not** stop using **ARMONAIR DIGIHALER**, even if you are feeling better, unless your healthcare provider tells you to. If you miss a dose of **ARMONAIR DIGIHALER**, just skip that dose. Take your next dose at your usual time. Do not take 2 doses at 1 time.
- AIRDUO DIGIHALER and ARMONAIR DIGIHALER can cause serious side effects, including:
  - **Fungal infection in your mouth or throat (thrush).** Rinse your mouth with water without swallowing after using **AIRDUO DIGIHALER** or **ARMONAIR DIGIHALER** to help reduce your chance of getting thrush.
  - Weakened immune system and increased chance of getting infections (immunosuppression). You should avoid exposure to chickenpox and measles, and, if exposed, tell your healthcare provider right away. Worsening of existing tuberculosis fungal, bacterial, viral, or parasitic infections, or herpes infection of the eye (ocular herpes simplex) may occur.
  - Reduced adrenal function. This can happen when you stop taking an oral corticosteroid (such as prednisone) and start taking a medicine containing an ICS (such as AIRDUO DIGIHALER or ARMONAIR DIGIHALER). During this transition period, when your body is under stress such as from fever, trauma (such as a car accident), infection, or surgery, adrenal insufficiency can get worse and may cause death. Symptoms of adrenal insufficiency include:
    - feeling tired
       Wea
      - Weakness
- low blood pressure
- lack of energy
   nausea and vomiting
  - .

Inhaler Technique 🛛 🗙	Tapping the Data navigation icon at the bottom of the Home Screen will display data from your inhaler events.
More about Digihaler Events	<ul> <li>Event data for all registered inhalers will be presented together if they were scanned into the app</li> </ul>
Every opening of the cap (with or without inhalation) counts as a Digihaler event.	<ul> <li>Selecting a specific inhaler will show you a screen with your inhaler events for the past 7 days, past 30 days, week, or month</li> </ul>
Only the first event (e.g. inhalation, exhalation) after cap opening is recorded. If the first event occurs after 1 minute of cap opening, regardless of flow rate, the event	<ul> <li>For AirDuo Digihaler and ArmonAir Digihaler: You will also see th anticipated number of events based on how often the medication is taken (twice daily)</li> </ul>
will be recorded as "Low (less than 30 L/min) or No Inhalation recorded within 1 min of cap open".	• Tapping on a specific day, from either the weekly or monthly view, will give you a breakdown of your inhalations for that day. Events will be listed in order from the first to the last, and are presented in different
Remember to close the cap after each use so your Digihaler will be ready for next use.	colored dots based on the inhalation category <b>(see Figure G</b> and below)

You can tap the in-app notification to review the details of your recent events.

Illustrated here with AirDuo Digihaler but also applies for ArmonAir Digihaler.

#### **IMPORTANT SAFETY INFORMATION FOR PROAIR DIGIHALER**

- PROAIR DIGIHALER may cause serious side effects, including:
  - worsening trouble breathing, coughing and wheezing (paradoxical bronchospasm). If this happens, stop using PROAIR DIGIHALER and call your healthcare provider or get emergency help right away. This is more likely to happen with your first use of a new asthma inhalation medicine
  - heart problems, including faster heart rate and higher blood pressure
  - $\circ~$  possible death in people with asthma who use too much PROAIR DIGIHALER
  - **allergic reactions.** Call your healthcare provider right away if you have the following symptoms of an allergic reaction:
    - o itchy skin
    - o swelling beneath your skin or in your throat
    - o rash
    - worsening trouble breathing
  - changes in laboratory blood values (sugar, potassium)

## IMPORTANT SAFETY INFORMATION FOR AIRDUO DIGIHALER AND ARMONAIR DIGIHALER

- For AIRDUO DIGIHALER, changes may occur in laboratory blood values (sugar, potassium, certain types of white blood cells)
- For **ARMONAIR DIGIHALER increased wheezing (bronchospasm) may occur.** Increased wheezing can happen right away after using **ARMONAIR DIGIHALER**. If this occurs, stop using **ARMONAIR DIGIHALER** and call your healthcare provider. Always have a rescue inhaler with you to treat sudden wheezing.

You will get a pop-up notification to check the dose counter on your inhaler when a refill might be needed **(see Figure K)**.

If you have more than 1 inhaler in this state, the notification will not show an inhaler name.

Illustrated here with ProAir Digihaler but also applies for AirDuo Digihaler and ArmonAir Digihaler.

If your notifications seem inconsistent with your usage, or if you are having difficulties seeing notifications, contact Customer Support at 1-888-603-0788

#### **IMPORTANT SAFETY INFORMATION FOR PROAIR DIGIHALER**

• The most common side effects of **PROAIR DIGIHALER** include:

• chest pain

- back pain
- o urinary tract infectiono your heart feels like it is
- body aches and painupset stomach

• sinus headache

- pounding or racing (palpitations)
- fast heart rate

• shakiness

- dizziness
  - sore throat
- nervousness
   runny nose
   headache
- IMPORTANT SAFETY INFORMATION FOR AIRDUO DIGIHALER AND ARMONAIR DIGIHALER
- Common side effects of AIRDUO DIGIHALER and ARMONAIR DIGIHALER include:
  - thrush in your mouth or throat. Rinse your mouth with water without swallowing after use to help prevent this.
  - Headache
  - cough
- Additionally, AIRDUO DIGIHALER has common side effects of:
  - back pain
  - infection of nose and throat (nasopharyngitis)

- Tap on the "Share" icon in the top right of the Data Screen to create a PDF report (see Figure L)
- You will be given the option to add your name and/or date of birth to the Report Cover page. If you choose to skip this step, the report will not include this information
- Select the way you want to share your report. Your options are via text, email, or AirDrop<sup>®</sup>

- The report will consist of 3 main sections:
  - **Cover page:** This page defines the different types of inhaler events and how inhalation airflow is measured. You can also see the Approved Uses, initial Important Safety Information, and link to Prescribing Information for all scanned inhalers
  - **Important Safety Information pages:** These pages provide Important Safety Information and links to Prescribing Information for all scanned inhalers
  - **Report data page(s):** These pages contain the actual reports of your inhaler events **(see Figure M)**. Each page displays 3 months of data for your healthcare provider or caregiver to view
- Remember, these reports are not intended for self-diagnosing purposes, but you can review them with your healthcare provider, if desired. Make sure you bring your inhaler within range of your smartphone to see the full details of your inhaler events each day
- There is no evidence the use of the app leads to improved clinical outcomes, including safety and effectiveness

#### **IMPORTANT SAFETY INFORMATION FOR PROAIR DIGIHALER**

• You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088

### IMPORTANT SAFETY INFORMATION FOR AIRDUO DIGIHALER AND ARMONAIR DIGIHALER

• You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.

ArmonAir digihaler (fluticasone propionate 113 mcg) Inhalation Powder

#### Important Notes About the Inhalers in the Digihaler Family

If you are having trouble setting up your Digihaler app, go to <u>www.digihaler.com</u>, or call Teva at 1-888-603-0788 for assistance.

It is possible that your inhalation notification may not show up immediately due to wireless transmission interruptions or other issues.

You may need to open the app to see notifications.

Do not bring your inhaler(s) into an MRI or CT/X-ray scan room.

Do not expose your inhaler to other known sources of electromagnetic interference (such as diathermy and RF ID systems). Your inhaler can be taken through standard security systems, such as metal detectors.

The electronic module complies with part 15 of the FCC Rules. Operation is subject to the following 2 conditions:

- (1) The electronic module may not cause harmful interference, and
- (2) The electronic module must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to the electronic module not expressly approved by Teva could void the user's authority to operate the equipment.

IP22 (protected against solid objects over 12.5 mm and direct sprays of water up to 15° from the vertical).

The Digihaler Bluetooth signal is discoverable, so inhaler ID (for example, Teva Inhaler) may be viewable by other mobile devices nearby. However, your inhaler use data is only sent to mobile devices that have been authenticated through the QR code.

#### SAFETY:

- IEC 60601-1:2005 + AMD 1:2012
- IEC 60601-1-11:2015

#### ELECTROMAGNETIC COMPATIBILITY:

- IEC 60601-1-2:2014
- ETSI EN 301 489-17 V2.2.1
- ETSI EN 301 489-1 V1.9.2
- 47 CFR Part 15 FCC 15 Class B
- ANSI C63.27<sup>™</sup>/D2.1
- CISPR 11 Group 1 Class B
- CISPR 22 Class B, 1-6 GHz
